

Die Intranet-Agentur.

Intelligente Erweiterungen mit der Power Platform

Dr. Julian Bahrs

 @bahrsys

Was ein Intranet erfolgreich macht? Was gehört dazu?

There is an app for that

We build in technology silos but need one cohesive experience

- Die Anzahl der Tools und Apps die ein Mitarbeiter benutzt, steigt
- Anwender sind häufig von der App-Anzahl überfordert (Umschalten, Daten übertragen, andere Bedienkonzepte, wissen welche es gibt ...)
- App-Silo

Was muss passieren, um schneller mehr mit dem DWP zu erledigen?

- Actionable Information
- Zugriff auf Daten und Aktionen statt Apps und Tools
- Integrierte toolübergreifende Lösungen für Aufgaben
- Personalisierung inkl. Kontext wie einzelner Prozess
- Realtime Feedback und Reports für Data driven Entscheidungen
- Antworten auf neu Fragen mit Fakten untermauern

„Enable everybody in every organization to achieve more.“

**AI
Builder**

**Common
Data Service**

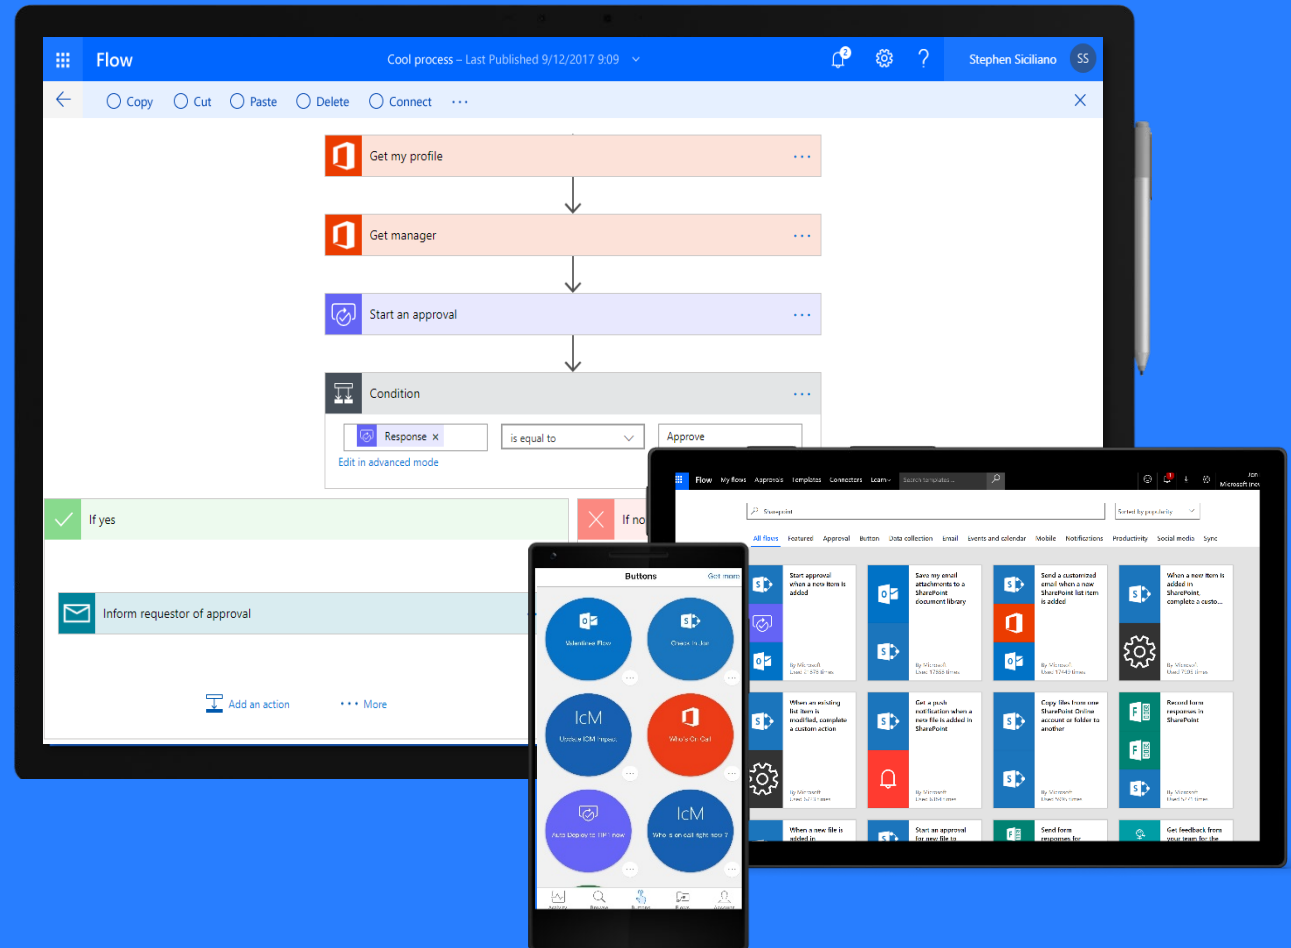

One **low-code** platform that spans Office 365, Dynamics 365 and standalone applications

Automate and integrate business processes with Microsoft Flow

- Model business processes and automate workflows and your apps and services
- Deep and broad, from simple individual automation to advanced org scenarios with branches, loops, and more
- Trigger actions, grant approvals, and get notifications right where you work

Anatomy of a workflow

Any platform support

Supports all major platforms, available on the web or with mobile on the go

Share flows like documents

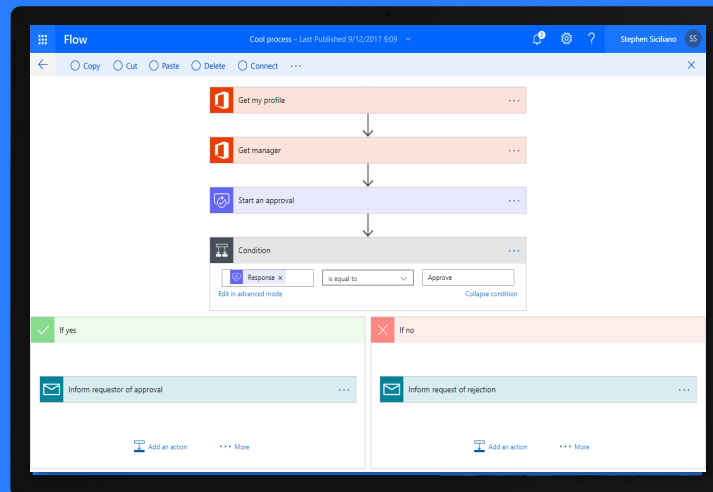

Share your flow with 3 clicks and an email address. It's pushed to users in seconds

Seamless integration

Directly integrated with PowerApps, Power BI, Microsoft Teams, Office 365, Dynamics 365 & Azure

Extensibility model

No limits. Automate advanced scenarios with multiple steps, branching conditions and more. Synchronize files between 1st and 3rd party systems seamlessly

WYSIWYG design experience

PowerPoint like drag and drop design experience. Start from a template, flow is running with live data as you build it

Data connectivity

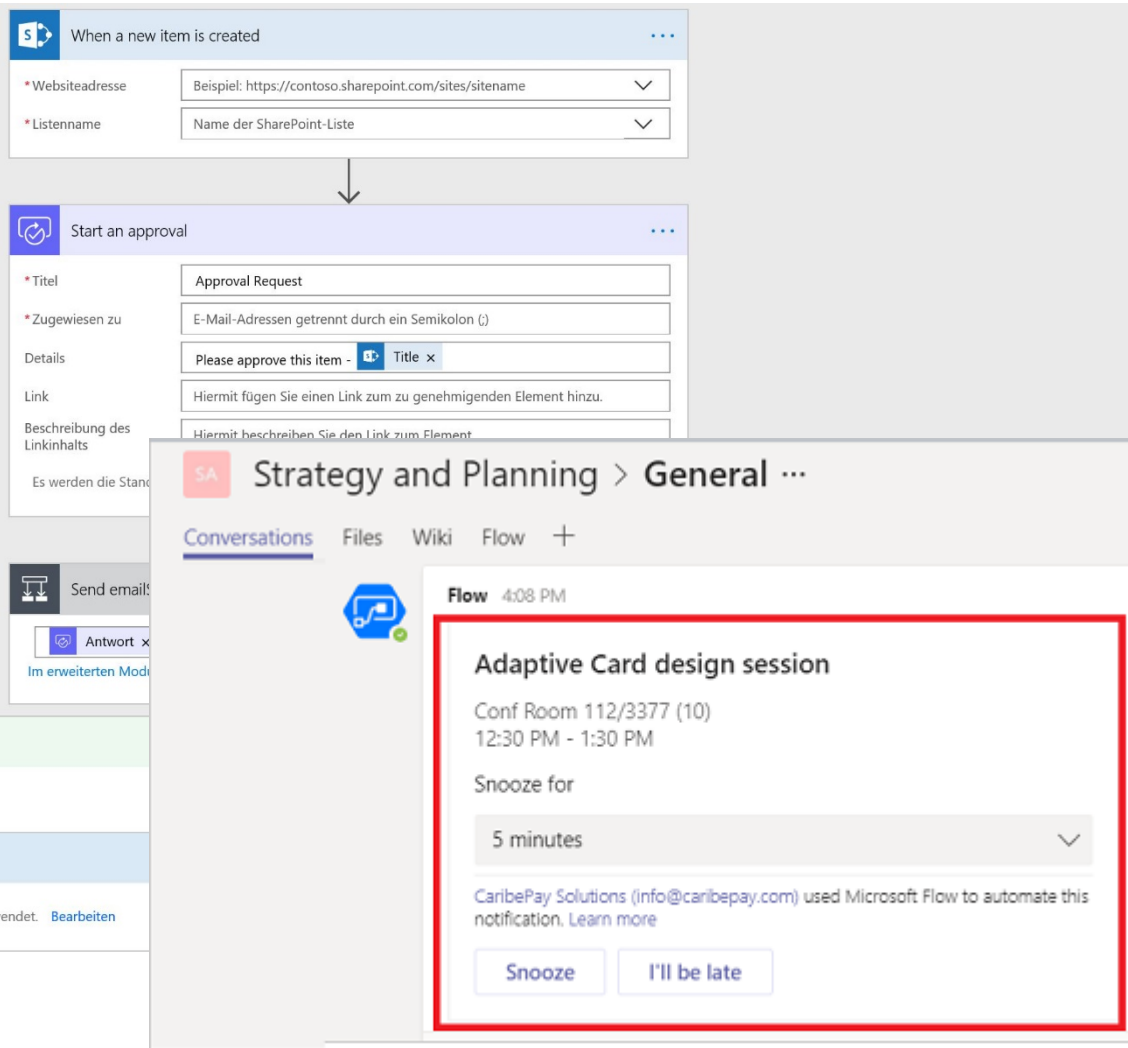

Connect to over 230 services with built-in connectors for everything from Adobe, to ZenDesk, to on-prem

Built-in data platform

Use the Common Data Service to store app data in a standardized Common Data Model

Logic and automation

Build flows that monitor and execute actions, leverage AI Builder to democratize AI, send emails automatically, notify people in processes

The image shows a Microsoft Flow configuration interface. The first step is 'When a new item is created' with fields for 'Websiteadresse' (Example: https://contoso.sharepoint.com/sites/sitename) and 'Listenname' (Name der SharePoint-Liste). The second step is 'Start an approval' with fields for 'Titel' (Approval Request), 'Zugewiesen zu' (E-Mail-Adressen getrennt durch ein Semikolon (;)), 'Details' (Please approve this item - [Title]), 'Link' (Hiermit fügen Sie einen Link zum zu genehmigenden Element hinzu.), and 'Beschreibung des Linkinhalts' (Hiermit beschreiben Sie den Link zum Element). Below the configuration is a notification card for 'Adaptive Card design session' in 'Conf Room 112/3377 (10)' from 12:30 PM to 1:30 PM. The notification includes a 'Snooze for' dropdown set to '5 minutes' and buttons for 'Snooze' and 'I'll be late'. The notification text states: 'CaribePay Solutions (info@caribepay.com) used Microsoft Flow to automate this notification. Learn more'.

- Daten generieren
 - Nutzungskontrolle
 - Zeiterfassung
- Freigaben und Reviews
 - Anträge wie z. B. Urlaub, internes Projekt, Beschaffung, ...
 - Dokumentenreview
- Automatisierung von Routinetätigkeiten
 - Wiederverwendung von Daten, z. B. Posts im Intranet, sobald extern ein YouTube-Video im Firmenkanal geteilt wird
 - Social Network Monitoring
 - Mit AI Builder kann z. B. vorab analysiert werden, ob Kommentare positiv oder negativ geschrieben sind
- Digitale Geschäftsprozesse

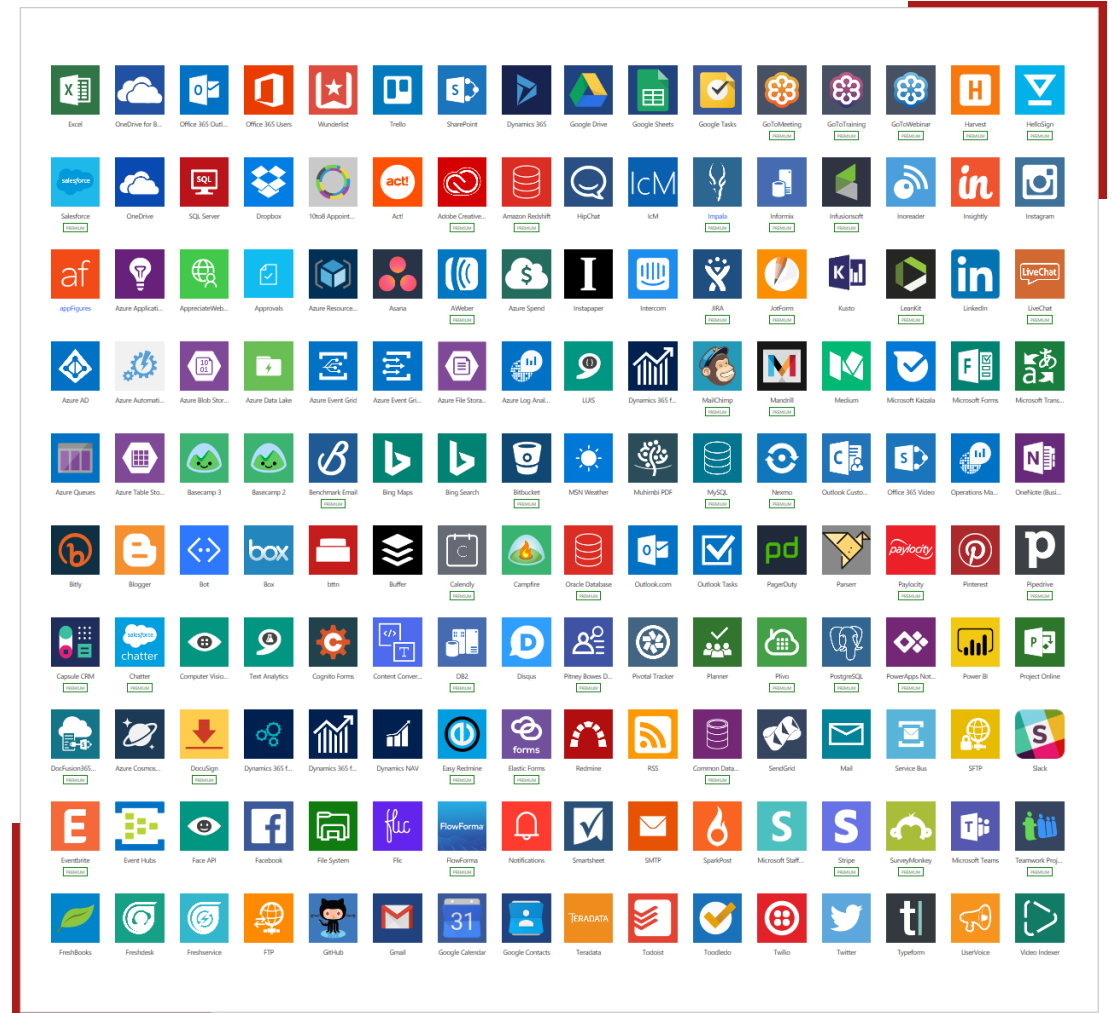

Built-in connectivity to over 230 cloud services, files, databases, web APIs, etc.

Seamless hybrid connectivity to On-Premises systems via the On-Premises Data Gateway

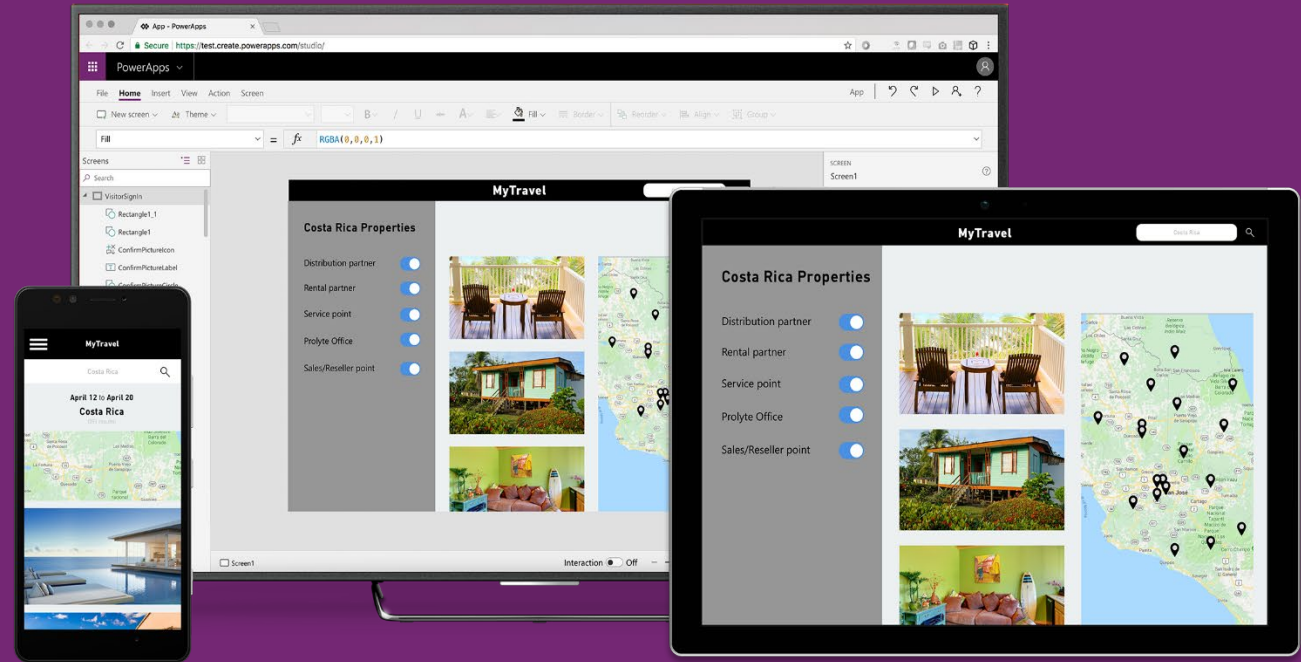

Build custom connectors for everyone to leverage

Build apps for web and mobile with PowerApps

- Easily build web & mobile apps with a full featured low-code/no-code development experience
- Empower business users to solve their own problems and easily share apps while maintaining security & governance
- Pro developer extensibility enables a “no limits” platform that spans business users to professional developers

Anatomy of an app

Any platform support

Supports all major platforms and gives native access to device capabilities like camera, GPS, pen & ink

Share apps like documents

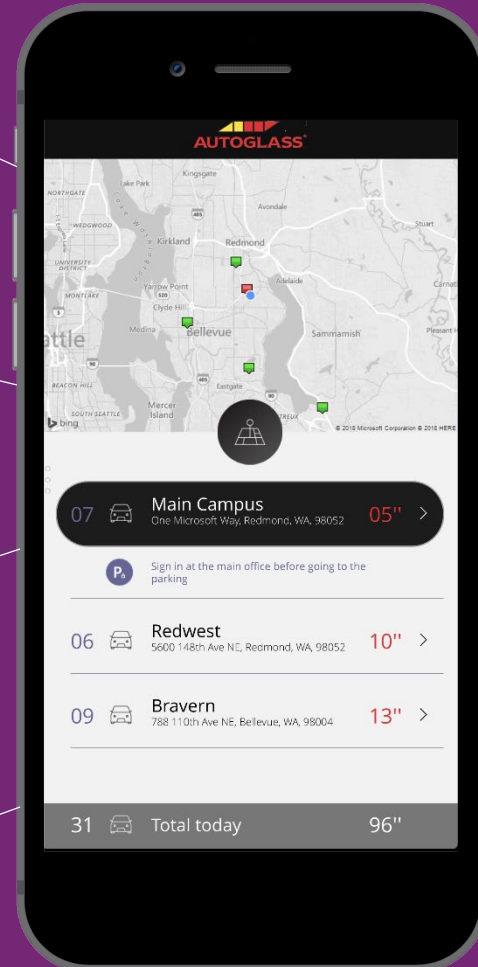

Share your app with 3 clicks and an email address. It's pushed to mobile devices in seconds

Seamless integration

Directly integrated with Microsoft Flow, Power BI, Microsoft Teams, Office 365, Dynamics 365 & Azure

Extensibility model

No limits. Get a pro-dev to build you a control or connector if you need something custom

WYSIWYG design experience

PowerPoint like pixel perfect drag and drop design experience. Start from a template, app is running with live data as you build it

Data connectivity

Connect to over 230 services and apps with built-in connectors for everything from Adobe, to ZenDesk, to on-prem

Built-in data platform

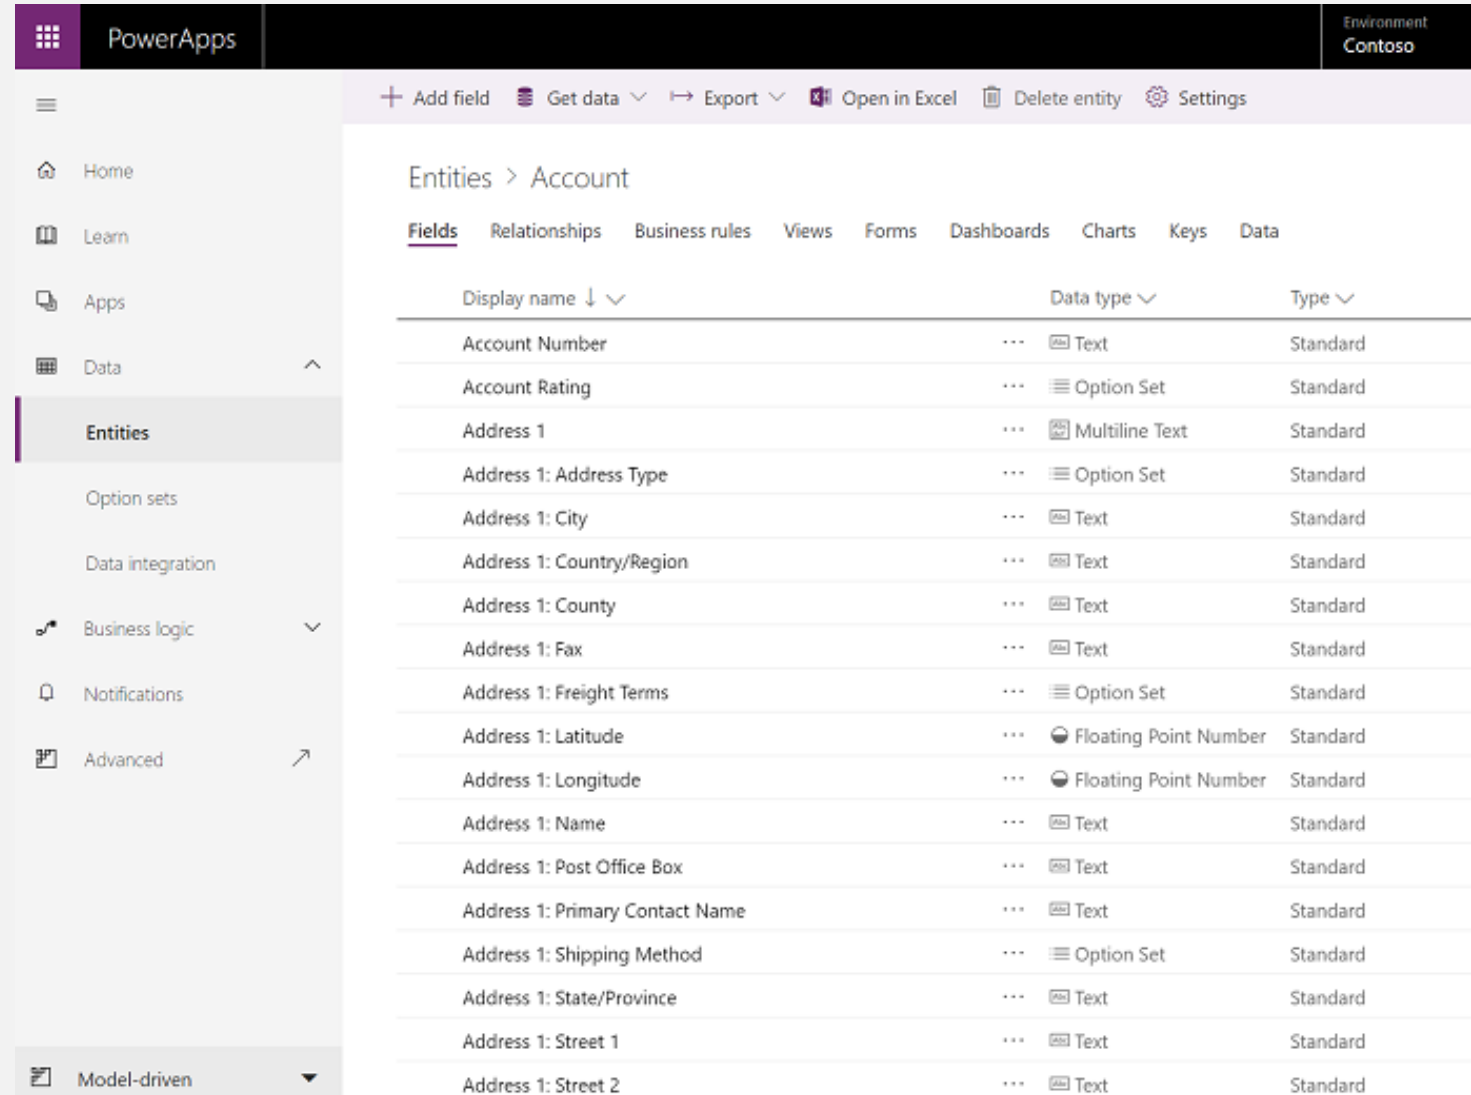

Use Common Data Service to store app data in a standardized Common Data Model

App logic

If you can understand formulas in Excel you can add logic to your PowerApp. Leverage AI Builder to democratize AI in your org

Wo liegen die Daten?

- Grundsätzlich können alle vorhandenen Daten in Office 365 und über Konnektoren genutzt werden
- Excel in OneDrive
- SharePoint Listen
- CDS (Common Data Service)

The screenshot shows the PowerApps interface for a 'Model-driven' application. The left sidebar contains navigation options: Home, Learn, Apps, Data, Entities (selected), Option sets, Data integration, Business logic, Notifications, and Advanced. The main area displays the 'Entities > Account' view, showing a table of fields with their display names, data types, and types.

Karl Gerd Schneider – 6 hours ago
Was ist RPA - Robotic Process Automation
Record -> Automate -> Play

The need for Robotic Process Automation

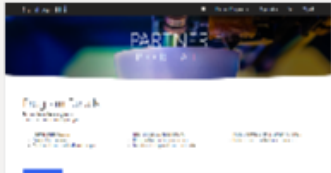

Break down the barriers to automating legacy software with RPA

Robotic process automation (RPA) enables you to automate mundane, rules-based tasks. With RPA you can automate legacy software without APIs.

It opens the world of automation to include software that's old or new, on-premises or in the cloud.

Was geht mit einem Standard E3 Plan?

Standard		Premium
Common cloud services and open protocols	Microsoft Services	
These services or protocols are what every modern worker needs to manage their day-to-day work. They span from social media to cloud file storage.	You can use any service from Microsoft. Some may be free, and others paid. Unlike the other three tiers these services are guaranteed to be available if you're using them elsewhere.	Professionals from sales to marketing to software development rely on these services to get their job done. These services are generally tailored to specific verticals.
If a service is available for free or it's an open protocol, it likely is in this tier.	If a service is provided by Microsoft, then it is in this tier.	If a service requires monthly or annual licenses, it's probably in this tier.
Some examples include: <ul style="list-style-type: none">- Dropbox- Facebook- GitHub- Google Drive- Twitter	Some examples include: <ul style="list-style-type: none">- SharePoint- OneDrive for Business- Dynamics 365- Office 365 Users- Office 365 Outlook	Some examples include: <ul style="list-style-type: none">- Common Data Service- DocuSign- MySQL- Salesforce- Zendesk

Hatha Yoga für Teilnehmer ohne und mit wenig Yogaerfahrung

Hatha Yoga ist ein Übungssystem, das Körper, Geist und Seele gesund und jung erhält. Es kann von Menschen jeden Alters praktiziert werden. Durch Atem-, Körper- und Entspannungsübungen ist es möglich wieder beweglicher zu werden, vielen Krankheiten vorzubeugen, Angst- und Verkrampfungszustände zu beseitigen, die Konzentration zu schulen und sich wohl zu fühlen.

ZURÜCK ZUR ÜBERSICHT

Meeting-Dokumentation in MS Teams

The screenshot displays the Microsoft Teams interface. On the left is a navigation pane with icons for 'Aktivität', 'Chat', 'Teams', 'Kalender', 'Anrufe', 'Dateien', and 'Apps'. The main area shows a meeting recording page for 'Company All Hands' on November 04, 2019, from 02:00 pm to 02:30 pm (30 minutes). The recording duration is 25:29:00. A 'Finish & Save' button is visible in the top right. Below the header, there are three panels: 'Attendees' with a list of participants (Lee Gu, Megan Bowen, Alex Wilber, Lynne Robbins) and an 'Email' button; 'Notes' with the text 'There is rumors About Project 783 not being as successful als reported.'; and 'Planner Tasks' with a task 'Follow up on Status Project 783' due on Nov 4. At the bottom, there is a 'Meeting Details' section with a 'Join Microsoft Teams Meeting' link and a conference ID: 916 595 003#.

PowerApps Portals: Engage with your customer

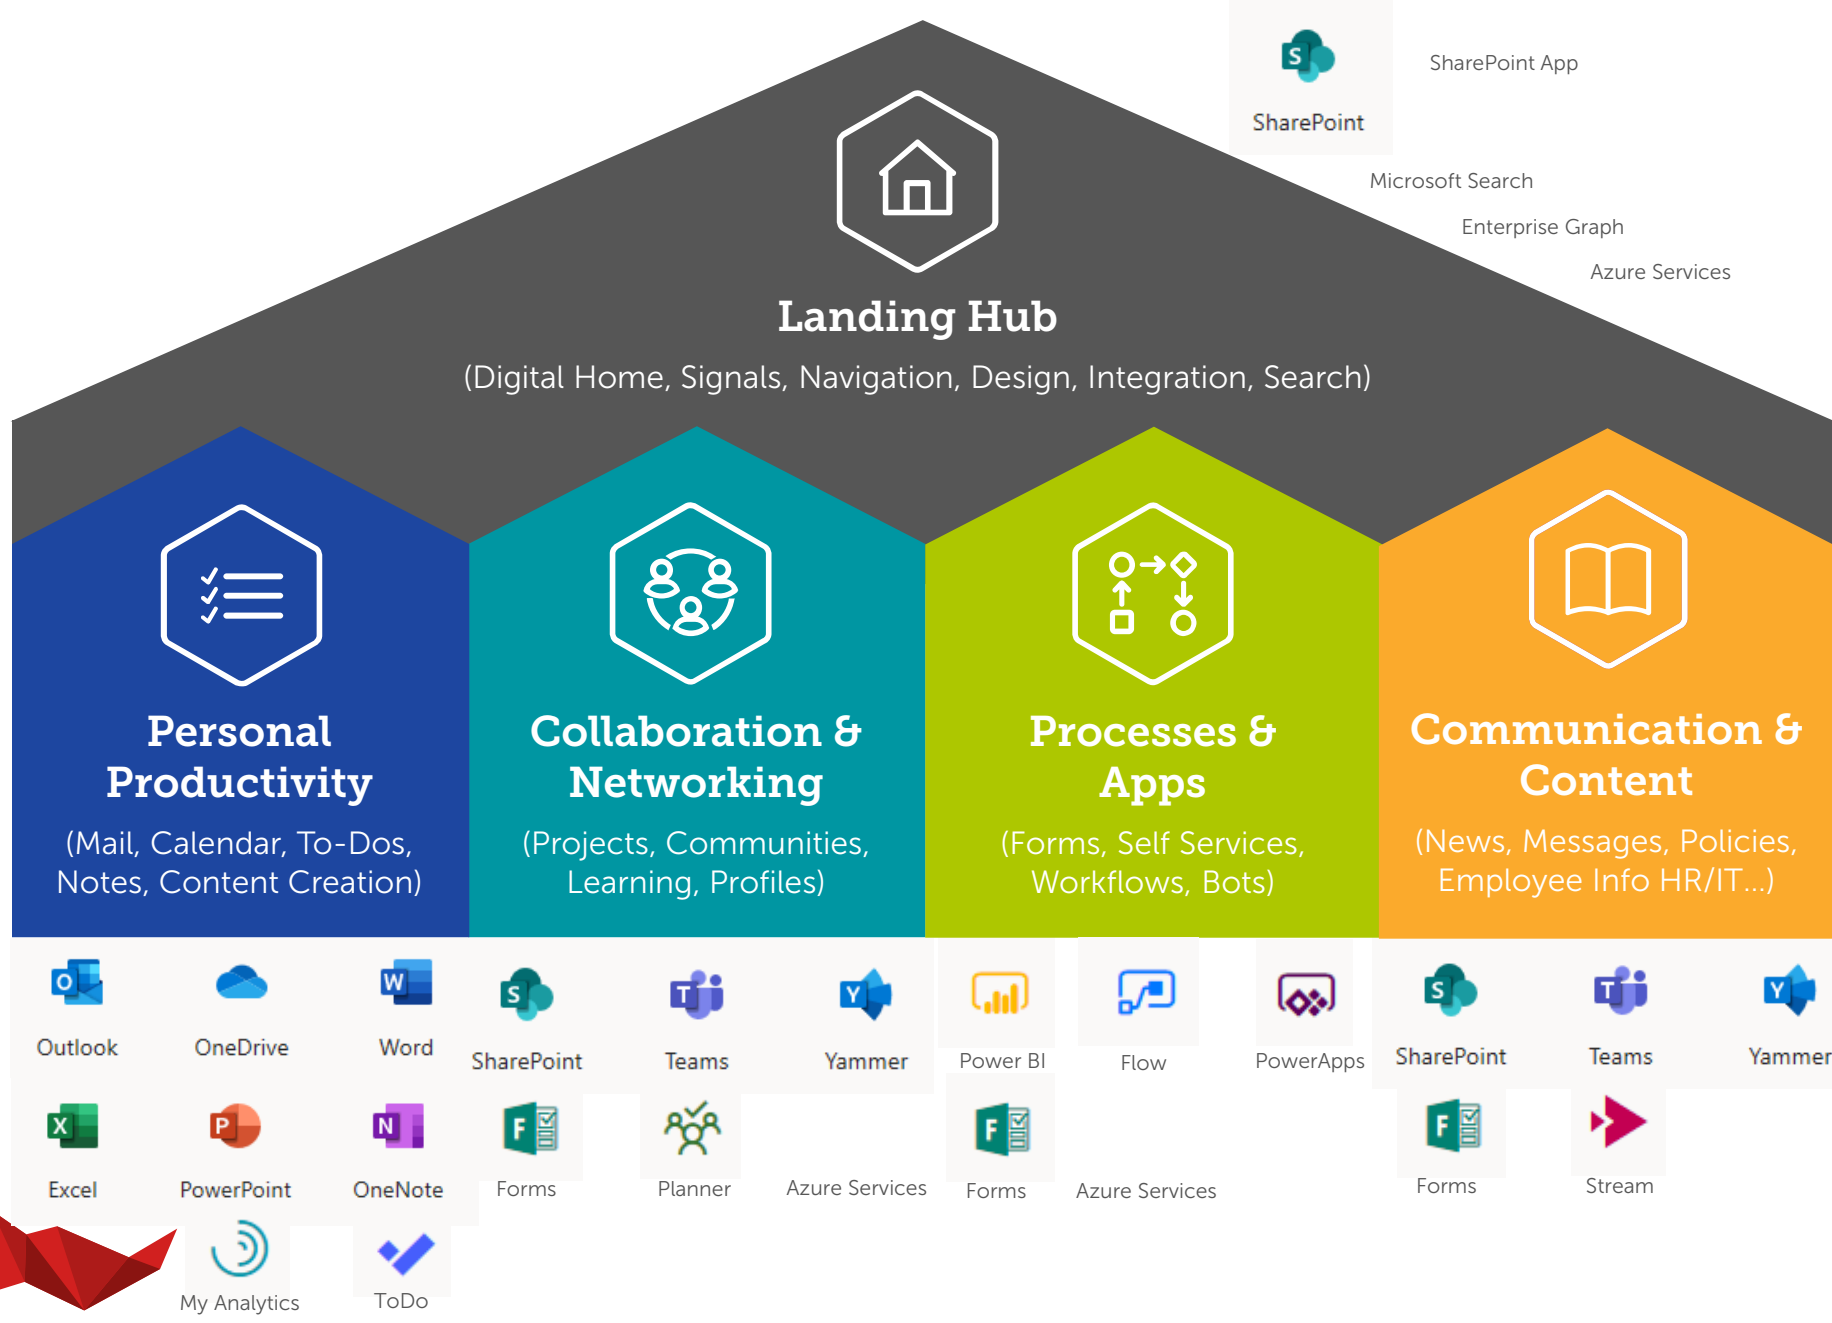

- Low code solution for creating multilingual, responsive websites for users external to organizations as well as internal employees.
- Use any of the commercial or enterprise login providers like Microsoft Account, LinkedIn, Azure AD B2C etc or even allow anonymous access.
- Use WYSIWYG designer to create website content and enrich with CDS/Dynamics data using familiar constructs like forms, views, charts, dashboards.
- Pro dev extensibility and templating capabilities to design complex business processes.
- Use prebuilt templates like Customer Self Service, Partner Management, Event Management, Community Self Service or create your own portal.

- Schnell, nicht ganz so low-code wie erwartet
→ Expressions, Formeln, Syntax ...
- Supermächtig wenn beherrscht – aber bei Weitem kein Ersatz für Individualentwicklung
- Überbrücken App-Silos
- Problemlose mobile Nutzung über die Flow-/PowerApp-App und im (mobilen) Browser
- Integrierbar ins Intranet und MS Teams und Microsoft Search

- Lizenzkosten sind schnell Thema

- Deployment-Prozess z. T. noch manuell (z. B. von Test zu Prod über Export-/Import, Versionskontrolle)
- Bisher kein automatisches Rollout mit Templates (z. B. Provisioning)
- Administration ist inzwischen gelöst (z. B. bestimmen, wer PowerApps anlegen darf)
